

Wallbox – software updates

Additional information

Any update always also includes all previous updates, even if you had previously not given your consent to them.

Very important: If you do not agree to an update and a defect occurs, Elli will not be liable for this if the defect is due to the lack of an update.

Changelogs:

v3.8.13;v3.29.7 25.07.2023

- The status determination of the wallbox has been improved. This will stabilize communication between the wallbox and the vehicle.

v3.8.12;v3.29.1 31.05.2022

- EEBus communication interface implemented (allows you to connect your wallbox to EEBus-enabled devices. For more information on EEBus please see the FAQs in our shop or visit the official EEBus website which you can find at eebus.org)
- upgrades to configuration manager (it is now easier and more intuitive to start up your wallbox unit. Upgrades include the ability to connect to the Internet via Wi-Fi or, optionally, via LTE)
- general improvements (more reliable communication between your wallbox and our IT system/backend)

v3.7.12;v3.25.2 17.01.2022

- Updated EksignCertificate (guarantees the connectivity of wallboxes with Internet capability to our IT system)

v2.14.4;v3.16.7 07.09.2021

- Improved WiFi connection and stability
- Improved LTE connection and stability
- Improved reliable transfer of kWh data
